Tableau-to-Amazon QuickSight Converter

Accelerate and automate your migration from Tableau to Amazon QuickSight

For organizations looking to shift from a Tableau data visualization solution to Amazon QuickSight, Wavicle offers its Tableau-to-QuickSight converter.

Our converter automates much of the migration process, using a two-step process to significantly reduce the time and cost of migrating Tableau dashboards and reports to Amazon QuickSight.
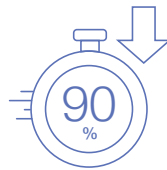

ANALYZE	The converter extracts Tableau files, either by connecting to the Tableau server, or by uploading a workbook file. It then analyzes the file, giving you a high-level summary and in-depth details about the size of the migration effort for each Tableau workbook and project, including the complexity and cost of migration. This includes insights about views, data sources, dataset definitions, custom SQLs, chart types, and much more. Within a few minutes, you'll have the information you need to make fast decisions about your migration effort.
CONVERT	Once it has been determined which dashboards to convert, we activate the converter to convert dashboards into your AWS environment and validate the conversion in Amazon QuickSight.

Reduce Amazon QuickSight conversion time and cost by up to 90%

By automating manual tasks and reducing resource requirements, Wavicle's converter significantly improves efficiency, accuracy, and cost of your migration and puts you on the path to realize value from your data faster.

Improve the speed of migration by up to 90% so you get value from your data faster

Reduce overall BI costs by up to 90%, including migration costs and licensing fees

Make informed migration decisions based on realistic cost and time estimates

Cloud data and analytics expertise from Wavicle

Increasingly, organizations are migrating data visualization solutions to Amazon QuickSight, a cloud-scale business intelligence (BI) service that enables organizations to deliver easy-to-understand insights to people at all levels of an organization, wherever they are.

Wavicle's experienced data and analytics consultants provide analytics strategy and development services along with our proprietary Tableau-to-Amazon QuickSight Converter to help organizations accelerate the shift to scalable, secure solutions that transform their BI and reporting capabilities.

As an AWS Advanced Tier Services Partner with a Migration Services Competency, we combine deep technical expertise with AWS services and industry knowledge to support a rapid shift to modern data architectures and fuel advanced analytics.
